- MySQL

Sankalp Dwivedi

Machine Learning Engineer · Full-Stack AI Developer · NLP & Speech Specialist

Passionate software developer with a strong background in AI-driven solutions integrated into full-stack environments. Proven expertise in developing custom modules, REST & GraphQL APIs, LLM-based systems, and speech/vision models. Adept at cloud deployment (AWS, GCP), multi-tenant architecture, and research-backed ML development — with excellent communication and collaboration skills.

PROFESSIONAL EXPERIENCE

- 

Hipster Inc — Lucknow, India

AI / ML Engineer

June 2025 – Present

- Designed and deployed AI-driven solutions integrated into full-stack environments built using Ruby on Rails, Laravel, and React.
 - Built REST and GraphQL APIs to serve ML inference results to frontend and backend applications.
 - Worked on LLM-based chatbots, recommendation engines, and computer vision modules tailored for various client projects.
 - Collaborated with cross-functional teams to implement end-to-end AI workflows — from data collection and preprocessing to deployment.
- 

Pinnacle Labs Pvt Ltd — Remote

Data Science Intern

May 2024 – June 2024

- Explored the role of data science in the software industry and solved real-world big data challenges.
 - Implemented data visualization techniques to communicate insights to stakeholders effectively.
 - Optimized machine learning models for improved prediction accuracy and performance.
- 

Campus Valley — Remote

Data Science Intern

April 2024 – May 2024

- Built projects including Titanic Prediction using supervised and unsupervised learning techniques.
 - Identified, analyzed, and interpreted trends in complex datasets; performed advanced data extraction and manipulation.
- 

Hipster Inc — Lucknow, India

Ruby on Rails Developer

Sep 2021 – Aug 2023

- Worked as backend developer on Ruby on Rails, building robust and scalable applications.
 - Created custom APIs for seamless integration with third-party services, expanding application functionality.
 - Collaborated closely with clients to translate requirements into technical specifications.
 - Debugged complex software issues, leading to more stable product releases.

- CERTIFICATIONS
- ▶

Oracle Fusion AI Agent Studio — Foundations Associate

▶

Oracle AI Vector Search — Certified Professional

▶

Oracle APEX Cloud Developer — Certified Professional

▶

Business Intelligence & Data Analytics — Macquarie University

▶

Introduction to Data Analytics — IBM

▶

Data Visualization (Excel & Cognos) — IBM

▶

Python Programming — University of Michigan

▶

Intel AI Global Impact — Generative AI

▶

GenAI Skill Badge — Google Cloud

▶

Vertex AI Skill Badge — Google Cloud

KEY PROJECTS

IgniteStudy — AI Study Material Builder

Python · Hugging Face · BART/T5 · BeautifulSoup · FPDF · TTS APIs · Cloud AI

AI-driven platform that automatically generates structured study materials — PDFs and video lectures — for any topic using transformer-based summarization (BART, T5), advanced web scraping, and AI-driven video lecture creation pipelines.

Speech Emotion & Gender Recognition

Python · Flask · PyTorch · Hugging Face · SpeechBrain · torchaudio · Librosa

Flask-based system to recognize emotions (happy, sad, angry, etc.) and gender from speech audio. Used pre-trained wav2vec models and integrated SpeechBrain for preprocessing and feature extraction.

Interactive Chatbot with LLMs

Python · LangChain · Pinecone · Hugging Face · Web Scraping

Context-aware chatbot that answers questions using LLMs and a Pinecone vector database. Scraped website content (e.g., Changi Airport), embedded it into vectors, and used LLMs for intelligent, relevant responses.

DomainNest — Multi-Tenant E-commerce

Ruby on Rails 7.2 · MySQL · ReactJS · Docker · GitHub CI · PWA

Multi-tenant e-commerce platform with subdomain-based tenant routing and row-level multi-tenancy. Leveraged Rails 7.2 features including PWA support, GitHub CI workflows, and an integrated admin panel via rails-admin gem.

ADDITIONAL PROJECTS

 MasterQuestionBuilder — Question Generator AI Model

 Emotion Detection from Videos & Real-Time Feed

 Movies Recommendation System

EDUCATION

PG

Master of Computer Applications — AI / ML

Chandigarh University

2025

UG

Bachelor of Computer Applications (BCA)

Lucknow Public College of Professional Studies

2023

12

High School — Intermediate

Lucknow Public School

2020

ACHIEVEMENTS

Headed the Academic Committee, organized 5+ events & workshops, driving a **40% increase** in student participation.

6kyu coder on Codewars with Honor 207 — global competitive programming platform.

Completed **Google Cloud Bootcamp** via GDSC, earning multiple Cloud skill badges.

RESEARCH PAPERS

Implementing Machine Learning using Ruby on Rails

From Fields to Algorithms: Enhancing Indian Agriculture with Machine Learning

CORE COMPETENCIES

OOP

NLP

Transformer Fine-Tuning

Multi-Tenant Architecture

Feature Engineering

Speech & Video Emotion Recognition

Scalable AI Systems

Responsive Web Design / PWA

Research Paper Writing

I hereby declare that the above information is true in all senses. – Sankalp Dwivedi

ML Engineer · Lucknow, India
